integration

Functionality of postal machines may vary according to the customer's preferences and specific operation conditions. We offer a wide range of hardware modules and software configurations. We also provide a centralized platform (own development software) for managing the PARCEL LOCKER COMPLEX for the purpose of renting out free cells to third persons (companies).

## ADVANTAGES OF THE SOLUTION:

PACKMAT is a modular parcel locker with proven reliability in handling high parcel volumes

- You can choose the layout, number of columns and slots according to your needs. The final price will form based on the number of columns and slots.
- The doors on the column can be chosen to open to the right or to the left. The parcel locker can also be installed in a corner.
